**Vision**

**Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?**

Disagree

**Why?**

Because I do not think there should be a future for the petroleum sector in NZ

**What is your vision for the minerals and petroleum sector in New Zealand?**

To phase out the extraction of petroleum to minimise NZ contribution to greenhouse gas emissions. A world-leading minerals sector that delivers value for New Zealanders, both now and in the future, in an environmentally and socially responsible way.

**How can New Zealand sustainably derive value from its petroleum and minerals resources?**

We should not extract any petroleum products. Mineral extraction should only occur at existing sites and no new extraction should be initiated.

**Objectives for the minerals and petroleum sector**

**Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.**

Agree

**Why?**

Because it includes the part about a transition to a carbon neutral economy

**Objective for a sector that: “Is productive and innovative”.**

Disagree

**Why?**

I prefer to stop the extraction of petroleum products entirely, even if that is at the expense of productivity

**Objective for a sector that: “Is effectively regulated”.**

Strongly agree

**Why?**

Effective regulation is essential

**Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?**

Phase out extraction of all petroleum products as quickly as possible, but in a just manner. No new fossil fuel extraction anywhere.
