**Vision**

**Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?**

Neither agree nor disagree

**Why?**

We need to focus on the rapid phase-out of fossil fuel extraction and transitioning away from relying on the industry delivering value for NZ.

**What is your vision for the minerals and petroleum sector in New Zealand?**

Diversifying and ultimately transitioning and becoming a different industry in low carbon technology and energy.

**How can New Zealand sustainably derive value from its petroleum and minerals resources?**

We need to focus on the rapid phase-out of fossil fuel extraction, that means no more permit extensions and a halt to deep-sea drilling and fracking. This needs to include a just transition for the working people and communities whose jobs currently rely on fossil fuel extraction. The Government needs to support working people and unions to train for new careers in clean industries. We need to build a circular economy that focuses on recycling and utilising waste resources before new mining for materials for the cleantech economy. Any extraction of minerals should only happen with greater input by iwi and hapu and with minimal environmental impact.
