Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Disagree

Why?

Its not possible to mine for minerals etc without harming the environment, we need to stop the extraction and look to a future without fossil fuels. No more renewing of mining/fracking/deep sea drilling permits.

What is your vision for the minerals and petroleum sector in New Zealand?

We need to clear up the mess we have already made environemtally without adding further.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

It cannot, we must look at renewable and greener resources. We are a small counry with a relatively small population - we could be the first to show the world it can be done.

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Disagree

Why?

we are not heading for a carbon neutral economy and any form of extraction isnt sustainable , there cannot be any of this 'by 2050' etc changes need to be made now.

Objective for a sector that: “Is productive and innovative”.

Disagree

Why?

Any amount of innovation wont help the areas where the extraction of mineral etc occurs

Objective for a sector that: “Is effectively regulated”.

Disagree

Why?

How can you have adequate regulation in a country prone to natural distaster, for example we know that an oil spill cannot be contained and would cause severe damage, the country is not in a positon to cope with a disater both finacially and gloably.

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

Dont renew extraction permits or issue new ones.

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Disagree

Why?

We keep telling the world that we are 100% pure. That is a lie .

Principle: Māori cultural interests are understood and respected.

Neither agree nor disagree

Why?

Principle: Support the transition to a carbon neutral economy by 2050.

Strongly disagree

Why?

It needs to be sooner. Too much irreversible damage will be done by 2050

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Disagree

Why?

It seems that the main cities get a disproportionate amount of attention and funding compared to the rest of the country.

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Strongly agree

Why?

This is the only way for the future.

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Why?

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Disagree

Why?

All corporations are lining their pockets and manage to wriggle out of paying taxes

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Neither agree nor disagree

Why?

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Neither agree nor disagree

Why?

We must not let them continue.

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Neither agree nor disagree

Why?

I dont know

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Neither agree nor disagree

Why?

Dont know what goes on behind closed doors, it all boils down to money.

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Agree

Why?

Principle: Strive to implement industry best practice in operations.

Agree

Why?

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Disagree

Why?

If there are known negative impacts then the whole process should not be happening.

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Why?

The companies will only be looking out for themselves and to watch their own back when the whole population would suffer the consequences

Are there any other principles you would like us to consider in the strategy?

Action areas intro

Action Area: Modernising the Crown Minerals Act

Agree

Why?

What future actions would you like us to consider under this Action Area?

Not renewing permits and issuing new permits.

Action Area: Securing affordable resources to meet our minerals and energy needs

Neither agree nor disagree

Why?

We should be mining landfill and then by the time that is exhausted we should have other systems lined up, gaining fuels from recycling and collecting methane from waste sites and animal effluent

What future actions would you like us to consider under this Action Area?

Again, no renewing of permits and no issuing new permits and see above

Action Area: Improving Treaty partnership

Disagree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving stakeholder and community engagement

Agree

Why?

It has to be the wider community (whole country)

What future actions would you like us to consider under this Action Area?

We need to clean up the country

Action Area: Improving industry compliance

Agree

Why?

What future actions would you like us to consider under this Action Area?

don't renew or re-issue permits

Action Area: Research and investment in better mining and resource use

Agree

Why?

Research and investment should be put to renewable sources

What future actions would you like us to consider under this Action Area?

Are there any other action areas you would like us to consider as part of advancing this Strategy?

Other

Are there any other comments you would like to make about the "Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029"?

Stop and think of the consequences if there was a disaster in this sector. We would certainly not cope with an oil spill when we can't keep our rivers clean. There must be a stop to deep sea drilling, fracking and mining, these activities threaten biodiversity of our environment. Resources need to be spent on renewable energies and recycling to clean up what we already have.
