**Vision**

**Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?**

Strongly disagree

**Why?**

This seems like an oxymoron. How can the petroleum sector deliver value in an environmentally and socially responsible way? What possible environmental value can the petroleum sector deliver?

**What is your vision for the minerals and petroleum sector in New Zealand?**

Zero petroleum extraction in NZ. Shift to 100% green energy and be a world leader in sustainable energy production. Be bold. This is a climate crisis. We need to do this for our future generations and for Papatuanuku.

**How can New Zealand sustainably derive value from its petroleum and minerals resources?**

Shift to 100% green energy.

**Objectives for the minerals and petroleum sector**

**Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.**

Strongly disagree

**Why?**

See my answer above. We need to replace the petroleum sector, not put nice words around it.

**Objective for a sector that: “Is productive and innovative”.**

Strongly disagree

**Why?**

We need to eliminate the sector, not help it be more productive in destroying the possibility of life on earth

**Objective for a sector that: “Is effectively regulated”.**

Strongly agree

**Why?**

**Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?**

Strongly agree

**Why?**

**Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.**

Strongly disagree

**Why?**

F\*\*\* the current permits (excuse my language). The Crown has a greater obligation to ensuring the future livability of the planet and its people. Again, this is a climate emergency

**Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.**
