Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly agree

Why?

It shows a level of decorum unfound in the greedy slaughter that is the modern oiling industry.

What is your vision for the minerals and petroleum sector in New Zealand?

I hope you all will have a greater understanding of it all, I only hope you lead with ethical clarity and a determination to complete your vision.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

I havent a clue.

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Strongly agree

Why?

It is ethical.

Objective for a sector that: “Is productive and innovative”.

Strongly agree

Why?

These are respectable objectives unshared by oil giants.

Objective for a sector that: “Is effectively regulated”.

Strongly agree

Why?

Regulation is great but needs to be effective.

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Strongly agree

Why?

We have but one Earth.

Principle: Māori cultural interests are understood and respected.

Neither agree nor disagree

Why?

As a Maori I am ewilling to hear out any ideas that might affect Iwi land. After all, we were succesfully colonised and therefore we are lucky to be even consulted on this matter. I say us all of our resources as you will as long as it remains ethical and you dont destroy everything.

Principle: Support the transition to a carbon neutral economy by 2050.

Strongly agree

Why?

Why not/

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Strongly agree

Why?

Its good to be involved at all unlike the current time.

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Strongly agree

Why?

Why be wholly reliant on anything other then our own sweat.

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Neither agree nor disagree

Why?

Sometimes you gotta piss some people off.

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Neither agree nor disagree

Why?

I personally believe the Crown will do as it will regardless of what the Iwi believes. This doesnt offend me and I give them my personal clearance to use my personal land for their projects as long as it is used well.

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Strongly agree

Why?

Gotta keep the crown happy.

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Strongly agree

Why?

Wouldnt it be nice, I could be down with this basic tenet.

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

Certain ruthless measures are required to change the world. Any resistance to the hollistic plan that continues to damage the situation should be given equivalent recompense in the new era.

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Strongly agree

Why?

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Strongly agree

Why?

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Strongly agree

Why?

Principle: Strive to implement industry best practice in operations.

Strongly agree

Why?

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Strongly agree

Why?

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Strongly agree

Why?

Are there any other principles you would like us to consider in the strategy?

Action areas intro

Action Area: Modernising the Crown Minerals Act

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Securing affordable resources to meet our minerals and energy needs

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving Treaty partnership

Neither agree nor disagree

Why?

The Iwi should be more open to the future and let go this false spirituality and improve the future for their descendants, which is what I believe our ancestors would give up anything to achieve. our
