**Other**

**Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?**

We need to focus on the rapid phase-out of fossil fuel extraction, that means no more permit extensions and a halt to deep-sea drilling and fracking. This needs to include a just transition for the working people and communities whose jobs currently rely on fossil fuel extraction. The Government needs to support working people and unions to train for new careers in clean industries.

We need to build a circular economy that focuses on recycling and utilising waste resources before new mining for materials for the cleantech economy.

Any extraction of minerals should only happen with greater input by iwi and hapu and with minimal environmental impact.
