Business name or organisation (if applicable):

Position title (if applicable):

Is this an individual submission or on behalf of a group or organisation?

Individual

Please indicate which group you most identify with or are involved in?

General public

Please specify the group that you most identify with

Please indicate which type of group your submission represents

Please specify the group or organisation that your submission is on behalf of.

Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Agree

Why?

If by world-leading you mean world-leading in phasing out petroleum and fracking etc then I agree...

What is your vision for the minerals and petroleum sector in New Zealand?

To phase out as much as possible to reduce our impact on the environment and climate change.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

We can look at other energy sources that are renewable, and look to derive value from those instead.

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Neither agree nor disagree

Why?

I don't believe a minerals and petroleum sector can be sustainable for a start. But yes I do agree in supporting NZ's transition to a carbon neutral economy.

Objective for a sector that: “Is productive and innovative”.

Neither agree nor disagree

Why?

I'd rather that it wasn't productive at all, and in doing so WAS innovative in turning to other solutions for employees in that sector

Objective for a sector that: "Is effectively regulated".

Strongly agree

Why?

Needs to much more regulated

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

Objective for a sector that : "is effectively phased out"

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Strongly agree

Why?

In my opinion this should be our number one priority on all matters. It's our most urgent and important issue.

Principle: Māori cultural interests are understood and respected.

Strongly agree

Why?

Absolutely. We have treated Maori terribly in the past, and until the culture is understood and respected by every New Zealander, then there is still work to do.

Principle: Support the transition to a carbon neutral economy by 2050.

Strongly agree

Why?

In fact lets get it done earlier than 2050 please.

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Strongly agree

Why?

Community is key.

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Strongly agree

Why?

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Neither agree nor disagree

Why?

Mainly just around the strategic direction of reducing climate change and becoming carbon neutral and therefore phasing out fossil fuel extraction

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Strongly agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Neither agree nor disagree

Why?

Just get rid of them and invest in renewables

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Neither agree nor disagree

Why?

Need strong regulations, no more permits etc.

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

We need to ACT NOW to prevent further destruction from climate change.

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Strongly agree

Why?

Best evidence being: fossil fuels are destructive.

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Strongly agree

Why?

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Neither agree nor disagree

Why?

Principle: Strive to implement industry best practice in operations.

Neither agree nor disagree

Why?

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Neither agree nor disagree

Why?

The whole industry has negative impacts. The only way is to phase it out.

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Neither agree nor disagree

Why?

Are there any other principles you would like us to consider in the strategy?

Action areas intro

Action Area: Modernising the Crown Minerals Act

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Phase out fossil fuel extraction. Create a circular economy

Action Area: Securing affordable resources to meet our minerals and energy needs

Stiongly disagree

Why?

phase out fossil fuel extraction

What future actions would you like us to consider under this Action Area?

invest in more renewable resources

Action Area: Improving Treaty partnership

Strongly agree

Why?

Maori ARE the rightful owners of our land. Their culture IS our culture as people of Aotearoa.

What future actions would you like us to consider under this Action Area?

Action Area: Improving stakeholder and community engagement

Strongly agree

Why?

All New Zealander's are stakeholders when it comes to contributing to climate change, so we need to engage to start to phase out this destruction

What future actions would you like us to consider under this Action Area?

Action Area: Improving industry compliance

Strongly agree

Why?

So much so that the industry doesn't want to continue!

What future actions would you like us to consider under this Action Area?

Action Area: Research and investment in better mining and resource use

Strongly disagree

Why?

No more mining please!

What future actions would you like us to consider under this Action Area?

Are there any other action areas you would like us to consider as part of advancing this Strategy?

Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

We need to focus on the rapid phase-out of fossil fuel extraction, that means no more permit extensions and a halt to deep-sea drilling and fracking. This needs to include a just transition for the working people and communities whose jobs currently rely on fossil fuel extraction. The Government needs to support working people and unions to train for new careers in clean industries.

We need to build a circular economy that focuses on recycling and utilising waste resources before new mining for materials for the cleantech economy.
