Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

My fear is that there is well intended wording in this, but the power of overseas markets and TNCs strips everything down to economics at the cost of people and the environment. Resources our finite and we are an isolated island. We need to plan for future scarcity by looking a new local tech to replace cheap Chinese minerals for example. Put more effort into reducing shortlived goods and move away from ‘buy it cheap, use it once, chuck it into landfill’. Kia kaha
