Is this an individual submission or on behalf of a group or organisation?

Individual

Please indicate which group you most identify with or are involved in?

General public

Please specify the group that you most identify with

Please indicate which type of group your submission represents

Please specify the group or organisation that your submission is on behalf of.

Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What is your vision for the minerals and petroleum sector in New Zealand?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

It can't and must not from fossil fuel.

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Strongly disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Objective for a sector that: “Is productive and innovative”.

Strongly disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Objective for a sector that: “Is effectively regulated”.

Strongly disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Strongly disagree

Why?

Weak, unclear and unenforceable words like "respect" must not be used. They must be replaced with strong, clear and enforceable words like "protect". For example:
Principle: The environment, ecosystems, and biodiversity are PROTECTED now and in the long term.

Principle: Māori cultural interests are understood and respected.

Strongly agree

Why?

Treaty of Waitangi.

Principle: Support the transition to a carbon neutral economy by 2050.

Strongly agree

Why?

2050 is too slow a transition. Human activity in and originating from New Zealand must be climate neutral or climate negative well before 2050.

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Strongly agree

Why?

The Treaty of Waitangi is the foundation document of Aotearoa New Zealand as a nation.

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and

inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on

which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Strongly agree

Why?

All Crown policies and actions must move in the direction of real direct democracy.

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: Strive to implement industry best practice in operations.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal

burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Are there any other principles you would like us to consider in the strategy?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action areas intro

Action Area: Modernising the Crown Minerals Act

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining

and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action Area: Securing affordable resources to meet our minerals and energy needs

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action Area: Improving Treaty partnership

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the

climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action Area: Improving stakeholder and community engagement

Neither agree nor disagree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action Area: Improving industry compliance

Strongly agree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Action Area: Research and investment in better mining and resource use

Strongly agree

Why?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

What future actions would you like us to consider under this Action Area?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Are there any other action areas you would like us to consider as part of advancing this Strategy?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.

Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

New Zealand must reduce the extraction and burning of fossil fuels to 50% by 2025 and to zero by 2030. There must be no new or expanded coal mines and no new coal burning plants. Deep sea oil exploration and fracking for oil and gas must end forthwith. Lesser ambition than these goals is inconsistent with the science on the climate emergency and its impacts, inconsistent with the precautionary principle, and inconsistent with the slightest duty of care not to destroy the support systems on which human civilization and all ecosystems on the planet depend. The draft Strategy, by comparison, proposes relatively minor reductions, but envisages continued mining and burning of fossil fuels for many decades, with no suggested end point. This approach is ecocide and is totally unacceptable.
