### Vision

### Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

### Why?

We need to end oil exploration now. There is no 'future' for petroleum or we will create a world where our children will have no future.

### What is your vision for the minerals and petroleum sector in New Zealand?

Transitioning to a circular economy and renewables

### How can New Zealand sustainably derive value from its petroleum and minerals resources?

It's can't. These are finite resources they are completely unsustainable.

### Objectives for the minerals and petroleum sector

### Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Strongly disagree

### Why?

Responsible to who? We are now over 400 parts per million in CO2 and still actively mining coal and drilling for oil. Which part of that is responsible exactly?

### Objective for a sector that: “Is productive and innovative”.

Neither agree nor disagree

### Why?

### Objective for a sector that: “Is effectively regulated”.

Disagree

**Why?**

The current transition plans are little more than greenwashing. To put people first we need to transition now otherwise we will create a world where our children can not thrive, or perhaps not even survive.
