

## Introduction

### Name:

Priscilla Luke

### Email:

Privacy of natural persons

### Business name or organisation (if applicable):

### Position title (if applicable):

### Is this an individual submission or on behalf of a group or organisation?

Individual

### Please indicate which group you most identify with or are involved in?

General public

### Please specify the group that you most identify with

### Please indicate which type of group your submission represents

### Please specify the group or organisation that your submission is on behalf of.

### Vision

### Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

### Why?

The Vision Statement is ONLY MERE WORDS that fall upon deaf ears when these Offshore and Foreign Industries are allowed to reap rape, and profit from our shorelines, our oceans, and our very country NZ. The alternative, however, is RENEWABLE ENERGY which should be our focus and the future of NZ. These Corporations profit from our Natural Resources and only 5% is given back to the Government. That's a pathetic amount and it proves how long these Industries have had the power for. Makes you wonder WHO IS TRULY RUNNING THIS COUNTRY???.Is it Our Government or is it the Lobbyists for these Industries???. ..Climate Change is on the rise as our weather patterns has altered dramatically around our Country. If YOU continue to make excuses for these Industries to operate, our very Sovereignty of NZ will be sacrificed under a false pretence that these Industries CARE when they DON'T. They are a money-making Corporations that will do what they want to make their MONEY, even at the expense of diminishing MOTHER NATURES creation.

### What is your vision for the minerals and petroleum sector in New Zealand?

RENEWABLE ENERGY...WHAT ARE YOUS AFRAID OF??????...

### How can New Zealand sustainably derive value from its petroleum and minerals resources?

Well, that's a question really for The Government. And why???.No matter what Party has Governed this Country, NOONE has ever made the attempt to make ANY CHANGES regarding Petroleum and Minerals....NO NZ GOVERNMENT has ever held them ACCOUNTABLE or responsible for pollution. No NZ Government has listened to the Calls of it's People in Aotearoa that this is not ok...We can all say we have a heart but who is BRAVE enough to have that HEART.....

**Objectives for the minerals and petroleum sector**

**Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.**

Agree

**Why?**

Why not?????....

**Objective for a sector that: “Is productive and innovative”.**

Neither agree nor disagree

**Why?**

Depends on how these technologies are used either for the good or bad if not monitored properly...

**Objective for a sector that: “Is effectively regulated”.**

Strongly agree

**Why?**

Most definitely....But how effective will this be as MOST of these Industries have a tendency not to adhere to regulations when there's NO independent and HONEST monitoring happening...In saying that, how can THE GOVERNMENT accept their word from sitting at their desks in the Beehive when there are people like myself who are surrounded or sight these Companies from our homes...It's all good to tick the boxes for these Industries but WHO IS GOING TO BE ACTIVELY INVOLVED in regulating this?????....

**Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?**

Listen to the People....

**Guiding principles**

**Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.**

Strongly disagree

**Why?**

Have you seen what's happening in our Country regarding the Environment?????....The RMA is feeble and non-binding for the Environment. It does not protect, nor respect the life force of our ecosystems...Its just a fairytale ideal that doesn't exist....

**Principle: Māori cultural interests are understood and respected.**

Strongly disagree

**Why?**

A definite NO....I know of certain Hapu that has jumped on the money wagon with these Industries and regrettably once these Companies have made their foundations on the landscape the relationship is frayed as there are no binding contracts to state that

Maori will or should be employed full time when the negotiations are only verbalised.  
That's what happens when you sit at the Table with the Devil....

**Principle: Support the transition to a carbon neutral economy by 2050.**

Strongly disagree

**Why?**

Should be sooner rather than later....How about 2025????...Let's Do This...

**Principle: The impact on people, communities and regions are managed in a just and inclusive way.**

Strongly disagree

**Why?**

Excuse me....WHOSE REAPING THE BENEFITS....

**Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.**

Neither agree nor disagree

**Why?**

Have to see it before I believe it....

**Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.**

Neither agree nor disagree

**Why?**

Have to see it before I believe it....

**Do you agree or disagree with each of the following principles for the Crown?**

**Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.**

Strongly disagree

**Why?**

The Crown does not meet the needs of MOST MAORI...Only to the pandering Maori who survive on the promise of obtaining lands that does not belong to them, nor they are affiliated too...I suppose when you sound distinguished and elite of course The Crown are going to believe them instead of having their own Research Team to ensure that the Maori they are dealing with ARE ACTUALLY the TRUE OWNERS they are meeting with...

**Principle: The Crown receives a fair financial return for its minerals and petroleum.**

Neither agree nor disagree

**Why?**

Dont know

**Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.**

Neither agree nor disagree

**Why?**

Depends whether the person leading it is ALL THAT...

**Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.**

Strongly agree

**Why?**

Of course they would.....Look whose the winners....

**Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.**

Strongly agree

**Why?**

Of course they would...The Crown is a faction of The Government....Why wouldn't they....Its not in our interest nor is it applicable to everyday kiwis...Business looking after Business.....

**Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.**

Neither agree nor disagree

**Why?**

I am not a Stakeholder....

**Do you agree or disagree with each of the following principles for Industry?**

**Principle: Pursue continuous improvements in health and safety.**

Strongly agree

**Why?**

Its imperative that these are implemented to ensure the employees are truly looked after, and that regulations are set in place...

**Principle: Strive to implement industry best practice in operations.**

Strongly agree

**Why?**

Yes but who is going to be honest enough to meet that need.....

**Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.**

Neither agree nor disagree

**Why?**

But I am for Renewable Energy...

**Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.**

Neither agree nor disagree

**Why?**

I am not a Stakeholder

**Are there any other principles you would like us to consider in the strategy?**

Listen to the People

**Action areas intro**

**Action Area: Modernising the Crown Minerals Act**

Neither agree nor disagree

**Why?**

I am for RENEWABLE ENERGY

**What future actions would you like us to consider under this Action Area?**

RENEWABLE ENERGY

**Action Area: Securing affordable resources to meet our minerals and energy needs**

Neither agree nor disagree

**Why?**

Seeing is believing...

**What future actions would you like us to consider under this Action Area?**

RENEWABLE ENERGY

**Action Area: Improving Treaty partnership**

Neither agree nor disagree

**Why?**

I do not approve of this partnership with Oil and Gas Industries with Maori.....Its not the way I was brought up....My beliefs are more aligned with protecting the Environment rather than sell it off and letting Foreign Offshore Companies profit...

**What future actions would you like us to consider under this Action Area?**

RENEWABLE ENERGY

**Action Area: Improving stakeholder and community engagement**

**Why?**

Don't know

**What future actions would you like us to consider under this Action Area?**

**Action Area: Improving industry compliance**

Strongly agree

**Why?**

Can I see an actual Contract that will hold them ACCOUNTABLE for this

**What future actions would you like us to consider under this Action Area?**

**Action Area: Research and investment in better mining and resource use**

**Why?**

I am against MINING as I live with a Open Cast Quarry at the back of me and I hate it as it is only for the RICH....We bought our home not knowing future developments were already in the process 7 years prior....

**What future actions would you like us to consider under this Action Area?**

Open Consultation to the Public so there's transparency.

**Are there any other action areas you would like us to consider as part of advancing this Strategy?**

Mentioned above...

**Other**

**Are there any other comments you would like to make about the 'Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029'?**

ENOUGH IS ENOUGH....CHANGE FOR THE BETTERMENT OF OUR TAMARIKI, OUR WHENUA, AND OUR PLANET....RENEWABLE ENERGY ALL THE WAY.....

**If you wish to, attach a document to this submission.**

**Use and release of information**

**We intend to upload submissions to our website at [www.mbie.govt.nz](http://www.mbie.govt.nz). Can we include your submission on the website?**

Yes

**Can we include your name?**

Yes

**Can we include your email address?**

No

**Can we include your business name or organisation?**

No

**Can we include your position title?**

No

**Can we include the group you most identify with (if submitting as an individual)?**

Yes

**Can we include the group your submission represents (if submitting on behalf of a group or organisation)?**

**If there are any other parts to your submission that you do not want public on the website please note them below:**

Show it all thanks.....

**OIA publishing warning**
