Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

Why?

It needs to include that this sector is PHASING OUT in a fair but swift manner, according to the requirements of climate science. The only environmentally and socially just way for this sector to behave is to begin this process. Now.

What is your vision for the minerals and petroleum sector in New Zealand?

Swift and socially fair way to phase out all petroleum exploration and high emissions minerals extraction

How can New Zealand sustainably derive value from its petroleum and minerals resources?

Use the resources and people currently available to build renewable infrastructure. No More Exploration. No More subsidies to fossil fuel industry

Objectives for the minerals and petroleum sector

Objective for a sector that: "Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy".

Strongly disagree

Why?

You are attempting to skew the answers with your statements. I refuse to be persuaded that there is value for my country if this industry continues. Why do we even have a Petroleum sector in government?

Objective for a sector that: "Is productive and innovative".

Strongly disagree

Why?

Not productive. Fossil fuels are driving the climate crisis. Don't pretend we can continue with BAU

Objective for a sector that: “Is effectively regulated”.

Strongly agree

Why?

Regulated into non existence

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Strongly agree

Why?

Principle: Māori cultural interests are understood and respected.

Strongly agree

Why?

Principle: Support the transition to a carbon neutral economy by 2050.

Neither agree nor disagree

Why?

Carbon neutral economy needs to be sooner than 2050.

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Agree

Why?

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Neither agree nor disagree

Why?

Because you did not mention that we must POWER DOWN. Reduse!!!

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Strongly disagree

Why?

End fossil fuel exploration and extraction

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Strongly agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Strongly disagree

Why?

No More exploration and extraction of fossil fuels

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Strongly agree

Why?

The Crown must listen to and respond to the climate science.

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

Halt all current petroleum permits. OMV out of the Great South Basin

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Why?

Based on the best evidence we are in a climate crisis. Keep the fossil fuels in the ground

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Agree

Why?

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Strongly agree

Why?

End the petroleum industry in NZ. Treat all workers fairly as they transition to renewable careers

Principle: Strive to implement industry best practice in operations.

Why?

as above

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Why?

as above

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Why?

as above

Are there any other principles you would like us to consider in the strategy?
