Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

Why?

The strategy should differentiate between fossil fuels, which must be phased out, and other minerals which should be assessed on their environmental impact.

What is your vision for the minerals and petroleum sector in New Zealand?

New Zealand's minerals and petroleum sector should operate under clear rules consistent with the Government's policy of zero carbon by 2050.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

By differentiating between fossil fuels which must be phased out and other minerals which should be assessed on their environmental impact.

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Strongly agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Neither agree nor disagree

Why?

Financial return should not override the need to phase out fossil fuels like coal, oil and gas.

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Strongly agree

Why?

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

The strategy needs to explicitly state that there will be no new licences and no renewal or extension of existing coal, oil and gas licences.

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Disagree

Why?

There should be a time frame for phasing out fossil fuels, in accordance with the Government policy of zero carbon by 2050, starting with no new coal mines and oil and gas wells.

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

Fracking doesn't appear to be adequately covered. This is a major omission given the method's destructive environmental impact.
