Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Neither agree nor disagree

Why?

I see no reason to aim to be world leading

What is your vision for the minerals and petroleum sector in New Zealand?

It should be minimal and focused on environmental concerns above all else.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

I dispute that deriving value is a requirement. Sustainability can be accomplished through care and reduction.

Objectives for the minerals and petroleum sector

Objective for a sector that: "Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy".

Agree

Why?

Objective for a sector that: "Is productive and innovative".

Neither agree nor disagree

Why?

Objective for a sector that: "Is effectively regulated".

Strongly agree

Why?

The industry has failed to respond to the market. Without regulation there will be no innovation.

**Principle: The Crown receives a fair financial return for its minerals and petroleum.**

Agree

**Why?**

The ground is a crown asset. The minerals and petroleum belong to us, not to the companies which extract them. We should own the resources and control their production, paying a fee for the extraction and refinement if we so chose.

**Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.**

Strongly agree

**Why?**

**Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.**

Disagree

**Why?**

This is a nation and international crisis. Contracts should give way to force majeure, not the other way around.
