Housing					
Mean weekly rent	2020	\$569	\$409	\$530	\$482
Average house value	2019	\$1,050,584	\$603,819	\$656,090	\$705,638

Population

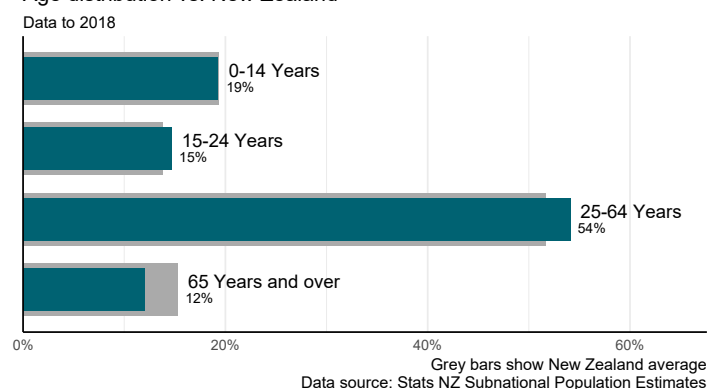

Auckland is the most populous region in New Zealand, as of 2018. Over the last 10 years, its population has grown by approximately 2 per cent per year.

Migrant/seasonal workers make up approximately 10 per cent of Auckland's workforce. Demand for temporary migrant workers is generally constant across the year.

Age distribution vs. New Zealand

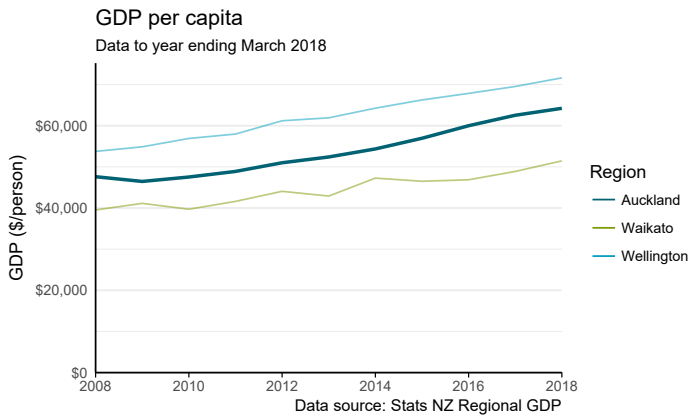

Auckland has approximately 26,400 young people not in education, employment, or training (NEETs).

Regional GDP

Auckland comprises 38 per cent of New Zealand's total GDP, with an annual GDP of \$107,754 million and a compound annual growth rate of 7 per cent per year (compared to the national growth rate of 6 per cent per year) over the past 10 years.

Regional GDP breakdown

	RGDP	% region	% industry
Manufacturing	\$10,168m	10%	38%
Professional, Scientific and Technical Services	\$9,878m	10%	46%
Financial and Insurance Services	\$8,500m	8%	56%
Rental, Hiring and Real Estate Services	\$8,364m	8%	42%
Information Media, Telecommunications and Other Services	\$7,365m	7%	47%
Wholesale Trade	\$7,276m	7%	56%
Owner-Occupied Property Operation	\$6,214m	6%	36%
Construction	\$5,935m	6%	35%
Health Care and Social Assistance	\$5,514m	5%	35%
Transport, Postal and Warehousing	\$5,448m	5%	43%
Retail Trade	\$4,811m	5%	39%
Education and Training	\$4,540m	4%	38%
Public Administration and Safety	\$2,952m	3%	27%
Administrative and Support Services	\$2,336m	2%	44%
Food and beverage services	\$1,707m	2%	41%
Forestry, Fishing, Mining, Electricity, Gas, Water and Waste Services	\$1,664m	2%	12%
Accommodation	\$481m	0%	27%
Agriculture	\$318m	0%	3%

Here “% industry” measures what percentage of New Zealand's output in that industry is produced by firms in Auckland.

Important industries

- The **Cafes, Restaurants and Takeaway Food Services** industry is the largest employer in Auckland, comprising 6 per cent of all employees.
- The top three industries (by number of self-employed workers) in Auckland are **Residential Building Construction** (10,500 self-employed), **Management and Related Consulting Services** (7,300 self-employed), and **Architectural, Engineering and Technical Services** (6,310 self-employed).

Regional specialisation is a measure of which industries are concentrated in Auckland. If the region specialises in an industry, it means that the industry's share of employment in that region is higher than the industry's share of employment nationally.

Spotlight on at-risk areas

In their recent report¹, the Organisation for Economic Co-operation and Development (OECD) identified a number of industries that are most likely to be hard-hit by quarantine measures as a result of COVID-19. Below, we present data on a subset of these industries.

Tourism

Tourism expenditure in Auckland totalled \$7,870 million for the year ending April 2020, accounting for 29 per cent of national tourism expenditure. Over the past five years, tourism expenditure in the region has grown an average of 4 per cent, compared to the national growth rate of 4 per cent.

Small and medium enterprises

Auckland contains 201,260 firms according to Stats NZ's Business Demography Statistics.

Firm size	Number of firms	% of region	National average
Self-employed	140,940	70%	67%
1 to 19	47,140	23%	25%
20 to 49	4,590	2%	3%
50+	8,590	4%	5%

Construction

1,840 building consents (for both new dwellings and alterations) were issued in Auckland in the month of March, a decrease of 2 per cent on the previous month.

Building consents offer a measure of intended activity in the building and construction sector. As well as providing insight into the health of the region's construction sector, this measure can also act as an indicator for regional growth.

Employment impact of COVID-19

Working by alert level

Under alert level four, Auckland was operating at approximately 43 per cent capacity. National average capacity under level four was 44 per cent. The change to alert level three saw 229,000 more people travelling to work.

	Level four		Total	Level three
	Essential	Non-essential		
Going to work	151,000	NA	151,000	380,000
Working from home	46,000	200,000	247,000	188,000
Unable to work	147,000	388,000	534,000	364,000
Total	344,000	588,000	932,000	932,000

Estimated number of workers at each level.
Data source: MBIE Essential Services

Benefits and subsidies

At most recent count, 105,260 Jobseeker benefits were reported in Auckland. This represents an increase of 27 per cent over this time last year.

Data source: Ministry of Social Development

Dependence on other regions

Auckland is somewhat less reliant than average on other regions. Firms in the region rely most heavily on Waikato for imports of goods and services, with 18 per cent of all imports coming from Waikato. In comparison, Taranaki is most reliant of all regions on goods and services from firms in this region: 70 per cent of all its imports come from Auckland.

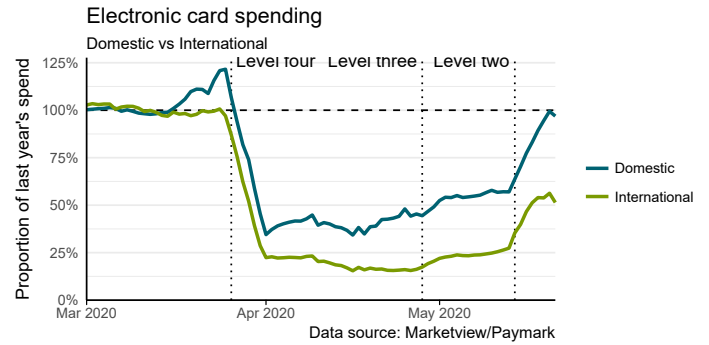

Tracking the recovery

Retail spending

Retail spending in Auckland is estimated using electronic card consumer spend data supplied by Marketview/Paymark.

Total card spend currently sits at approximately 95 per cent of last year's levels. In comparison, national spending is currently 100 per cent of last year. Domestic spending sits at 97 per cent of last year's levels, while international spending sits at 51 per cent.

Spend patterns for selected industries are provided below.

For further information on Marketview/Paymark spend data, please visit MBIE's retail spend dashboard².

Data sources and glossary

Stats NZ subnational population estimates

This data is provided by Stats NZ, and provides provisional estimates of the resident population for regional council and territorial authority areas in New Zealand.

Stats NZ Household Labour Force Survey

The Household Labour Force Survey (HLFS) provides New Zealand's official employment and unemployment statistics.

Stats NZ regional GDP calculations

This data is provided by Stats NZ, and is a geographic breakdown of national GDP presented in nominal terms. Regional GDP provides an indication of the size and structure of regional economies and provides a benchmark for measuring changes to regional economies over time.

MBIE Labour market contributions

Labour Market Contributions data is extracted from the Stats NZ IDI, and details the number of workers in each region and industry by visa and beneficiary status. The data includes employed people only, excluding self-employed and anyone not paid via PAYE payroll. Data provided here is suppressed in some cases, and random rounded to base three in all cases.

The results in this paper are not official statistics. They have been created for research purposes from the Integrated Data Infrastructure (IDI) managed by Statistics NZ. The opinions, findings, recommendations, and conclusions expressed in this paper are those of the author(s), not Statistics NZ. Access to the anonymised data used in this study was provided by Statistics NZ in accordance with security and confidentiality provisions of the Statistics Act 1975. Only people authorised by the Statistics Act 1975 are allowed to see data about a particular person, household, business, or organisation. The results in this paper have been confidentialised to protect these groups from identification. Careful consideration has been given to the privacy, security, and confidentiality issues associated with using administrative and survey data in the IDI. Further detail can be found in the Privacy impact assessment for the Integrated Data Infrastructure available from www.stats.govt.nz.

For further information on the data contained in this fact sheet, please email us: E&ICOVID-19EvidenceBase@mbie.govt.nz.

You can find further information on regional economic activity in MBIE's Regional Economic Activity Tools: <https://www.mbie.govt.nz/nzregions>.

MBIE monthly regional tourism estimates

This data, published by MBIE, provides an estimate of regional monthly expenditure on tourism for both international and domestic consumers. The expenditure is modelled from electronic card transaction data representing approximately 60 per cent of all electronic transactions in New Zealand.

Linked employer-employee data

Linked Employer-Employee Data (LEED) data is taken from Stats NZ. It uses business and personal tax records to provide detailed estimates of the number of employees, both self-employed and waged-salaried.

MBIE essential services data

Essential services workforce estimates are taken from MBIE. The data provides estimates of the workforce by industries and regions under New Zealand COVID-19 alert levels three and four. The charts are based on Scenario two, which is a mid-range estimate by accounting for the expected reduction in worker demand due to such factors as lack of worker availability, reduced consumer demand, and the need to introduce new ways of working. For more information on MBIE's essential services estimates, please see our [Essential Services Workforce Fact Sheet](#).

Ministry of Social Development benefits data

This data is provided by the Ministry of Social Development, and covers caseloads of *Jobseeker Support–Work Ready*, *Jobseeker Support–Health Condition and Disability*, and *Other Main Benefit* claimants by region. This can be used to monitor take up by individuals and households and is a proxy for the number of people unemployed.

Stats NZ Building consents data

This data is provided by Stats NZ and covers the number of building consents issued for both new buildings, and alterations to existing buildings, every month.

MBIE Regional Input/Output tables

This data provides an estimate of the flow of goods and services between sectors and regions within New Zealand.
