

**New Zealand Customs Instructions**  
**Galvanised Wire from China**  
**MBIE/AD/I/2020/002/Rev.2**  
**March 2021**

## **1. Introduction**

Following determinations made by the Minister of Commerce and Consumer Affairs (the Minister) on step 2 of the investigation into dumping of galvanised wire from China, the previous instructions (MBIE/AD/I/2020/002/Rev.1) regarding provisional anti-dumping duties on imports from China have been replaced by the current instructions.

There is no confidential information contained in these instructions. Any queries concerning these instructions should be directed to the Trade and International team of MBIE. Contact details are given at the end of these instructions.

## **2. Goods Subject to Anti-Dumping Duties**

### **Description**

The goods which are the subject of the investigation, hereinafter referred to as “galvanised wire” or “subject goods”, are:

Galvanised steel wire of high, medium and low tensile strength between 2mm and 4.5mm in diameter, excluding armouring wire.

The description also excludes PVC (polyvinyl chloride) coated galvanised wire.

### **Country of Origin**

The country of origin of the subject goods is China.

## **3. Anti-Dumping Duties**

### **Form of Duty**

The anti-dumping duties are imposed through *ad valorem* (percentage) duty rates where the amount of duty payable is the Customs value for duty (VFD) multiplied by the relevant percentage rate.

### **Rates of Duty**

The anti-dumping duties apply to Chinese suppliers of the subject goods as set out below:

| <b>Chinese Supplier</b>                          | <b>Ad valorem duty rate</b> |
|--|-----------------------------|
| Beijing Steels Metal Co Ltd                      | 24%                         |
| Dingzhou Five-Star Metal Wire Mesh Manufactory   | 36%                         |
| Hebei Longsheng Metals and Minerals Co Ltd       | 30%                         |
| Hebei Metals and Minerals Import and Export Corp | 29%                         |
| Tianjin Huayuan Times Metal Products Co Ltd      | 27%                         |
| All other suppliers                              | 0%                          |

## Method

For each importation of galvanised wire it is necessary to identify the value for duty (VFD) of the subject goods. The anti-dumping duty payable is the designated *ad valorem* rate of the VFD of the subject goods.

### Example

You have an invoice issued by a Chinese supplier, e.g. Beijing Steels Metal Co Ltd, listed above for importation of galvanised wire originating from China as follows:

| Description                             | Quantity<br>Kilograms (kgs) | FOB Value<br>USD1,700/ Tonne | VFD Value<br>*NZD2,615/ Tonne |
|---|-----------------------------|------------------------------|-------------------------------|
| Galvanised wire 2.5mm but less than 4mm | 20,000                      | 34,000.00                    | 52,307.69                     |

\*The exchange rate at the date of importation is USD0.65 = NZD1.00

For 20,000 kgs (20 tonnes) of *Galvanised wire 2.5mm but less than 4mm*, the total VFD amount in NZD is  $(20 \times 1700 = 34,000 \div \text{USD exchange rate}) = \text{NZD}52,307.69$ .

The total anti-dumping duty payable is 24% of the VFD =  $\text{NZD}52,307.69 \times 0.24 = \text{NZD}12,553.85$ .

### Invoiced Currency

In normal circumstances the goods subject to the anti-dumping duties covered by these instructions are invoiced in USD. Therefore (as in the example) the USD invoice should be converted to NZD using the Customs rate of exchange applicable on the date of importation for the purposes of calculating anti-dumping duty. Invoices in other currencies should also be converted to NZD accordingly.

## Period of application

The anti-dumping duties apply from 12 March 2021 until 12 March 2026, unless terminated or modified by the Minister.

## 4. Goods previously subject to provisional anti-dumping duties

Provisional anti-dumping duties which were the subject of Customs Instructions MBIE/AD/I/2020/002 and MBIE/AD/I/2020/002/Rev.1 ceased to have effect on 11 March 2021, being replaced by the current Customs Instructions.

The Minister of Commerce and Consumer Affairs has required that any provisional anti-dumping duties collected in excess of the rates of duty specified above should be remitted.

Provisional anti-dumping duties in excess of the duties now imposed may have been paid in relation to goods exported by:

- (a) Chinese suppliers other than the suppliers specified above who may have paid provisional duties at the rate of 28% whereas the duty now applicable to such suppliers is 0%.
- (b) The supplier Bekaert (Qingdao) Wire Products Ltd, which was originally subject to provisional measures at a rate of 7% whereas the duty now applicable to this supplier is 0%.

## NOTES

### General

An ALERT has been put in place for Tariff Item 7217.20.10 and Statistical Keys 05L, 07G, 08E, 09C, 11E, 13A, 15H, 16F, 17D, 18B, 25E, 27A, 28K, 29H, 31K, 33F, 35B, 36L, 37J and 39E, and Tariff Item

7217.20.90 and Statistical Keys 05D, 07L, 08J, 09G, 11J, 13E, 15A, 16K, 17H and 18F of the Tariff of New Zealand for subject goods originating from China.

NOTE that some of the goods entering under the Tariff Items and Statistical Keys listed above include goods that are not subject goods, and which are not subject to anti-dumping duty, e.g. galvanised wire of diameters below 2.00mm.

## **Further Information**

Should you have any queries regarding the operation of the anti-dumping duties described in these instructions please contact Trade Remedies as shown below:
