Subject: Unfair Price of Insurance.

The price we pay for Insurance is far too high. The entire earthquake experience was corrupt. Why were people paid out huge amounts for their homes then allowed to keep them and sell them? That's double dipping! You can't do that when your car is written off! We are paying for all of those people that were paid out and Insurance companies could not recoup any of that money. Insurance is far too high. Guess nothing will change. Insurance companies do what they like. Even choose not to pay out if it suits them.
