To whom it may concern

If this is going to be carried out, please make it similar to Kiwi Saver, which means people have the opportunity to opt-out of the scheme,

According to the title, "income-insurance", it tells me the labor government is taxing people to pay insurance, so can you tell which insurance company is involved in this insurance proposal?

I seriously don't know why Grant Robertson is in charge of the economy for this country, don't simply copy things from other countries and paste them here, New Zealand seriously is not that developed in many perspectives.

Stop printing money and taxing your people, remember labor is elected by people, and "tax bite" is not the reason why labor was elected.

Start doing business if money is really an issue, domestic need is not an advantage for NZ, as there are only 5 million people, and nearly half is not working, so please be open, trade, catch up with other countries, go out and make connections as much as you can even in this pandemic, otherwise why does Jacinda promote vaccines so much? deceive herself and others?
