I object to the proposed income insurance policy.

We are the working poor. My income barely covers our bills at the moment and prices are increasing.

If we lose any more money we will be financially unable to survive!

We pay tax and GST on everything.

I know our country needs money and I think China should be paying out billions for the disease they let out into the world.

Get your money from them, not from hard working New Zealanders whose wages are already well below other countries.
