According to the need and demand of hospitality industry and considering New Zealand is a tourism country. And we making more than half of our money by tourism, At the same time we having shortage of workers and that time migrants full fill that needs and they paying right amount of taxes and getting not enough government facilities however, they are entitle of some facilities like medicals and so on. So they playing a crucial part in our life's. I strongly believed that changes making the matter more worst for both of the migrant workers and local people.

What impacts or implications do you foresee from these options?

Give details of the occupations or sectors you think are likely to be affected.

As we considering seasonal staff I guess that wouldn't provided a smooth and consistent service in any occupation and industry as all industry having their own nature of work way and seasonal staff can't be match with that.

Consider the list of seasonal occupations being considered.

Are there any seasonal occupations that should be added or removed from this list? Why?

As we considering seasonal staff I guess that wouldn't provided a smooth and consistent service in any occupation and industry as all industry having their own nature of work way and seasonal staff can't be match with that.

Consider the list of seasonal occupations being considered.

If you employ seasonal staff, or represent a sector with seasonal staff:

- What are the occupations of the seasonal staff within the sector that you are commenting on?
- For each of the occupations that you have identified, what is the typical period that you require seasonal staff to cover (e.g the peak of the season)?

As we considering seasonal staff I guess that wouldn't provided a smooth and consistent service in any occupation and industry as all industry having their own nature of work way and seasonal staff can't be match with that.
