Page 4: New Zealand's interests in space

Q7 **General interest in space, Work in the New Zealand space sector**

What are your interests and relationship to space? Pick as many as apply below:

Q8 **Respondent skipped this question**

Please note any other interests and relationship to space below that you would like to share.

Page 5: New Zealand's values in space

Q9

To what extent do you agree or disagree that these values should apply to New Zealand's space activities and engagements?

Innovation	Strongly agree
Responsibility	Strongly agree
Stewardship	Strongly agree
Partnership	Agree

Q10

Are there any other values, or aspects of kaitiakitanga (guardianship), that you think should apply to New Zealand's space activities and engagements? For example, cultural values regarding space.

Not in particular, We want to ensure that those values are always heard and respected so we can understand how best to move forward as we introduce new technology.

With any advancement in technology, we divide the spiritual and the scientific. In my opinion neither one coin habitat. So in saying that it's extremely important to ensure that we respect everyone from the Rangatira to the new comers with beliefs, Land sea and to the stars, to advise on anything that could be considered Tapu.

As far as the Guardianship, New Zealand is in a privileged position, especially when it comes to 'launch' to be able to Vet or get incite into what is being launched by other countries.

This may not happen on Foreign soil to the same extent or potentially with the same intent.

We shouldn't block this capability we should encourage the opportunity.
