Page 3: Submitter Information

Q2 **No**

Are you making this submission on behalf of a business or organisation?

Page 4: New Zealand's interests in space

Q7 **General interest in space**

What are your interests and relationship to space? Pick as many as apply below:

Q8 **Respondent skipped this question**

Please note any other interests and relationship to space below that you would like to share.

Page 5: New Zealand's values in space

Q9
To what extent do you agree or disagree that these values should apply to New Zealand's space activities and engagements?

| | |
|----------------|--------------------------|
| Innovation | Strongly disagree |
| Responsibility | Agree |
| Stewardship | Agree |
| Partnership | Agree |

Q10 **Respondent skipped this question**

Are there any other values, or aspects of kaitiakitanga (guardianship), that you think should apply to New Zealand's space activities and engagements? For example, cultural values regarding space.

Page 6: New Zealand's space policy objectives

Q11

Rank these key policy objectives in order of importance to you: Click and drag to reorder the objectives from 1 (most important) to 5 (least important)

| | |
|---|---|
| Growing an innovative and inclusive space sector | 5 |
| Modelling sustainable space and Earth environments | 2 |
| Promoting the responsible uses of space internationally | 1 |
| Protecting and advancing our national security and economic interests | 4 |
| Regulating to ensure space activities are safe and secure | 3 |

Page 7: Growing an innovative and inclusive space sector

Q12

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to grow an innovative and inclusive space sector?

| | |
|--|-------------------|
| Promoting New Zealand's natural advantage for conducting space activities, and research and development expertise across the space value chain | Strongly disagree |
| Partnering within New Zealand and internationally to increase research and development capabilities | Strongly disagree |
| Identifying opportunities to increase diversity in the space sector | Strongly disagree |
| Using cutting-edge space technology and space sourced data to support New Zealand's values and interests | Strongly disagree |

Q13

Respondent skipped this question

Do you have any comments on these policy objectives? (e.g. any suggested change to how they are framed? Is there anything missing?)

Q14

Are there any other policy objectives that you think would help the New Zealand government to grow an innovative and inclusive space sector?

Keep artificial objects out of space

Q15

Do you have any questions or comments about what these objectives would mean in practice?

Humans have created terrible problems on Earth by our lack of responsibility and care for the world and its inhabitants. Don not spread this terrible experience into space

Page 8: Promoting the responsible uses of space internationally

Q16

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to promote the responsible uses of space internationally?

Advocating for effective international rules, norms and standards in space **Strongly disagree**

Partnering with like-minded launch states to adopt peaceful, responsible and sustainable space practices **Strongly disagree**

Collaborating internationally to increase New Zealand's influence and capabilities in the global space sector **Strongly disagree**

Q17

Do you have any comments on these policy objectives (e.g. any suggested change to how they are framed? Is there anything missing?)

Aotearoa should only act to reduce the impact of humans on space not do anything to continue, support or encourage

Q18

Are there any other policy objectives that you think would help the New Zealand government to promote the responsible uses of space internationally?

keep out of space

Q19

Do you have any questions or comments about what these objectives would mean in practice?

reallocation of resources to support sustainability on Earth

Page 9: Protecting and advancing our national security and economic interests

Q20

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to protect and advance our national security and economic interests?

Use space assets to protect and advance New Zealand's national security and economic interests **Strongly disagree**

Manage the broad range of security risks in space to protect New Zealand's space industry **Strongly disagree**

Collaborate with international space and security partners to pursue New Zealand's national security and economic interests **Strongly disagree**

Q21

Do you have any comments on these policy objectives (e.g. any suggested change to how they are framed? Is there anything missing?)

Keep out of space

Q22

Are there any other policy objectives that you think would help the New Zealand government to protect and advance our national security and economic interests?

Keep out of space

Q23

Respondent skipped this question

Do you have any questions or comments about what these objectives would mean in practice?

Page 10: Modelling sustainable space and Earth environments

Q24

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to model sustainable space and Earth environments?

| | |
|--|--------------------------|
| Encouraging inclusive, sustainable space collaborations within New Zealand | Strongly disagree |
| Assessing the cumulative impact of space activities on the Earth environment | Strongly disagree |
| Assisting with solving sustainability challenges through space data, including to better monitor or understand the Earth's environment | Strongly disagree |
| Investing in New Zealand's capability to retain, grow, access and use sustainable space technologies | Strongly disagree |

Q25

Do you have any comments on these policy objectives (e.g. any suggested change to how they are framed? Is there anything missing?)

'Sustainability challenges' (weasel words) will not be solved in space. This is a completely spurious argument put forward to justify unsustainable behaviours

Q26

Are there any other policy objectives that you think would help the New Zealand government to model sustainable space and Earth environments?

Keep humans out of space

Q27

Respondent skipped this question

Do you have any questions or comments about what these objectives would mean in practice?

Page 11: Regulating to ensure space activities are safe and secure

Q28

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to promote the responsible uses of space internationally?

Facilitating the safe and secure use of emerging space technologies from New Zealand **Strongly disagree**

Clarifying what New Zealand space activities are inconsistent with the national interest **Strongly disagree**

Promoting and protecting New Zealand's interests through permitting space technologies **Strongly disagree**

Q29

Respondent skipped this question

Do you have any comments on these policy objectives (e.g. any suggested change to how they are framed? Is there anything missing?)

Q30

Respondent skipped this question

Are there any other policy objectives that you think would help the New Zealand government to ensure space activities are safe and secure?

Q31

Respondent skipped this question

Do you have any questions or comments about what these objectives would mean in practice?

Page 12: Regulating in line with our national interests

Q32

Are there any comments you would like to make about these criteria that inform consideration of the national interest?

Unscrupulous and selfish people can justify anything - there is nothing to be gained for the Earth and its inhabitants or space and its inhabitants by scientists, businessmen and politicians justifying their personal interests with spurious 'scientific' or 'sustainability' reasons

Q33

What questions do you have about how the national interest is considered in practice?

Do policy advisors ever think about the havoc and misery that the last 300 years of 'scientific' enquiry and experimentation have caused in the world or are they all blinkered, shallow followers of fashion?
