## Questions on increases to rates set by the cost of treatment regulations

## Question 1

Do you agree that tailored payment increases reflecting wage increases in the main occupational groups (option D in discussion document), which will result in the increases detailed in Table 4 reproduced below, best meets the following policy objectives:

- Claimants are able to access treatment, meaning co-payments should be affordable
- Costs to ACC are sustainable, affordable and predictable (gradual increases)
- Payments are not too dissimilar between the health and ACC systems.

If you do not agree, why not? Please provide reasons for your view.

I don't see listed Psychotherapists or Psychologists which I would like to see having pay parity especially considering that PBANZ who regulates Psychotherapists see the obtaining of this level of qualification equal to a Masters level qualification. When a practitioner shows that they have obtained additional levels of furthering tertiary education, this also should be reflected in their wage increase.

Having a slight wage advantage over counsellors undermines the significance of the work that Psychotherapists achieve in my opinion. Psychotherapy grew from Psychoanalyst Freud who pioneered working with personality and significant trauma issues. This should be recognised by ACC especially in the ISSC work being completed and complex clients should be allocated accordingly so as they are 'fitted' with the appropriately trained therapist available otherwise this is a disservice.
