Page 9: Protecting and advancing our national security and economic interests

**Q20**

To what extent do you agree or disagree that these policy objectives will help the New Zealand government to protect and advance our national security and economic interests?

Use space assets to protect and advance New Zealand's national security and economic interests **Strongly agree**

Manage the broad range of security risks in space to protect New Zealand's space industry **Strongly agree**

Collaborate with international space and security partners to pursue New Zealand's national security and economic interests **Strongly agree**

---

**Q21**

Do you have any comments on these policy objectives (e.g. any suggested change to how they are framed? Is there anything missing?)

Including defence as well as security in the formulation of the objectives. Collaborate didn't seem like strong enough language for how we want to interact with partners, and this statement shows no reciprocity in the relationship - how will we also develop shared objectives?

Page 12: Regulating in line with our national interests

**Q32**

Are there any comments you would like to make about these criteria that inform consideration of the national interest?

Contributing to nuclear weapons programmes or capabilities is in function a meaningless distinction - nuclear weapons capabilities include any space based intelligence systems. We should be supporting our defence partners with their space based intelligence capabilities, and should remove confusing concepts like nuclear weapons capabilities which are vague.

---

**Q33**

**Respondent skipped this question**

What questions do you have about how the national interest is considered in practice?
