New Zealand Government

Foreword

With the sunniest climate in New Zealand's North Island, a reputation as New Zealand's top holiday destination and a vibrant arts and cultural scene, the Bay of Plenty stands out as an appealing destination for migrants looking for a change of pace and an outdoor-driven lifestyle.

In this report, we take an in-depth look at the Bay of Plenty's migrants, forming a picture of who they are, where they have come from and how long they have lived in New Zealand. We also compare the Bay of Plenty migrant picture with the rest of New Zealand.

One of the key drivers of immigration is to supply the skills businesses need that cannot be located in our local labour market. This report identifies how the Bay of Plenty's migrant population are represented in the Bay of Plenty labour force – with a particular focus on skilled migrants.

It is important that the Bay of Plenty's economic growth continues to be stimulated and sustained through the ongoing attraction and retention of skilled migrants, and Immigration New Zealand has developed a number of approaches to support this goal.

Immigration New Zealand works closely with key agencies and groups in the Bay of Plenty in order to attract and retain migrants with the skills and inward investment that the local economy needs.

One of the key ways in which this can be achieved is through knowledge-sharing. The statistics and trends identified in this Immigration New Zealand report provide migrant-specific information that will explain current trends and guide future economic planning.

Bay of Plenty Context

The Bay of Plenty lies east of the Kaimai-Mamaku Ranges and south of the Coromandel Peninsula in the North Island and is known for its beaches, kiwifruit, tourism, forestry and geothermal energy. It is also home to New Zealand's only active marine volcano (White Island).

The major population centres are Tauranga, Rotorua and Whakatane. The Tauranga labour market is the fifth largest in New Zealand, and over the past 20 years Tauranga City has experienced one of the fastest rates of population growth in New Zealand.

Around 300,000 people (seven percent of New Zealand's overall population) live in the Bay of Plenty. There is a significant aging population (15 percent are aged over 65, with 25 percent projected to be in this age group by 2031) and a large young Maori population (34 percent are aged under 15).

The net migration population is expected to grow by 16,400 people between 2006 and 2031, and a further 35,600 people are expected through natural increases. Population growth is expected to be concentrated in Tauranga City and the Western Bay of Plenty District, with declining populations in the Eastern district.

With an overseas-born population of 17 percent, the Bay of Plenty matches that of the Rest of New Zealand (excluding Auckland). The largest group (40 percent) has migrated from the United Kingdom and Ireland, with a smaller quantity (22 percent) from Asia. Most of the recent migrants arriving in the past two years have been from Asia (45 percent).

About a quarter of the overseas-born population has been living in the Bay of Plenty for five years or more, with 39 percent there for 20 years or more. The migrant population is more qualified than the New Zealand population which is consistent with other regions in New Zealand.

As in other parts of New Zealand, rural communities in the Bay of Plenty are thinning out as people move into growing cities, such as Tauranga. The Bay of Plenty has a higher than average level of deprivation, especially within the rural Eastern parts of the region.

The region's eight local authorities have collectively developed the Invest Bay of Plenty Plan. The plan aims to provide a shared vision and collective voice for development in the Bay of Plenty. It identifies key goals for the next 30 years and provides a concise and high-level strategy for accomplishing these objectives.

Introduction

Purpose

The purpose of this paper is to provide an overview of the Bay of Plenty's current migrant population and migration trends, and specifically to look at the impact migrants in the Bay of Plenty have on the region's labour market.

The data in the report is publicly available through the websites of Statistics New Zealand and the Ministry of Business, Innovation and Employment (MBIE).

Background

A driving goal of Government is to build a more competitive and internationally focused economy. Migration plays a key role in meeting this goal as it helps grow New Zealand's labour force which in turn drives our economy. Migration also increases international connections that give access to foreign knowledge, foreign capital and international trade.

In July 2014, Government approved the New Zealand Migrant Settlement and Integration Strategy, a revised approach to successfully settle and integrate migrants in New Zealand.

The Migrant Settlement and Integration Strategy builds on the New Zealand Settlement Strategy which led settlement work in New Zealand over the past decade. It places value on the economic contribution of migration and stresses the importance of the long-term integration of migrants in conjunction with successful initial settlement.

The strategy's aim is that migrants: "Make New Zealand their home, participate fully and contribute to all aspects of New Zealand life".

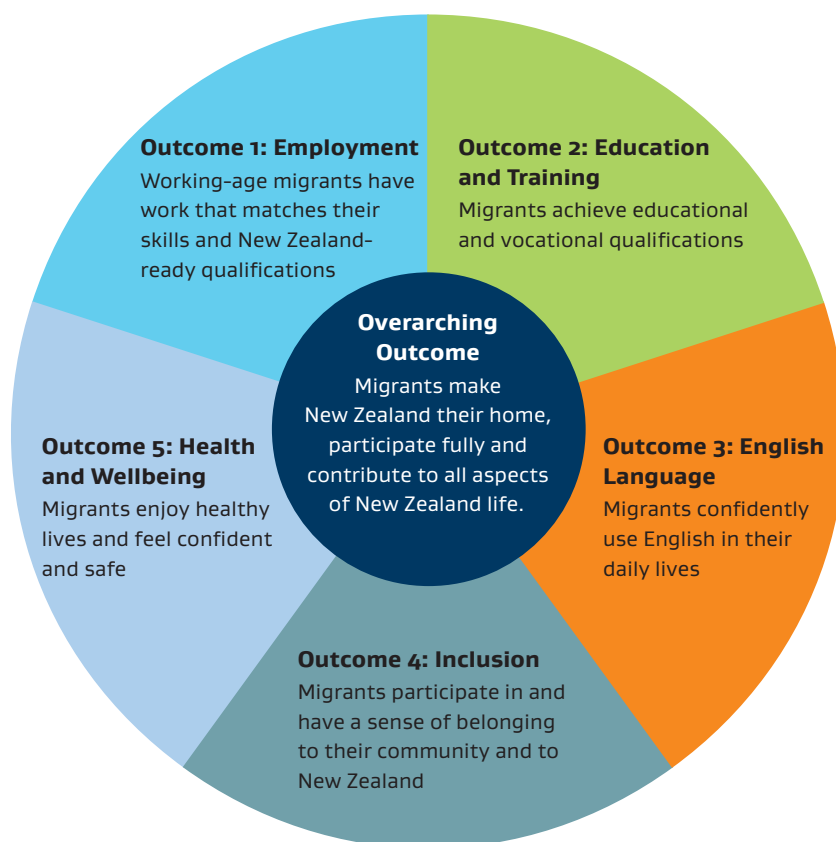

Key to achieving this aim are the strategy's five outcomes – Employment, Education and Training, Inclusion, English Language and Health and Wellbeing (see page 6).

Employment, and Education and Training are the key outcomes for the strategy (reflecting their importance to the Government's Business Growth Agenda).

However, all five outcomes are strongly interconnected and contribute to the strategy's aim, as well as to each other. For example, good English language skills and good health support migrants' participation in employment, while education and training helps them to make social connections that support their wellbeing and inclusion.

New Outcomes Framework for Migrant Settlement and Integration

As part of the strategy, regional support to attract and retain migrants is being stepped up, with Immigration New Zealand establishing new Regional Partnership Agreements. The first of these Agreements is underway in Auckland.

Quality immigration data on the current migrant population in the Bay of Plenty, their participation in the work force, as well as future projections of inward and outward migration, helps inform the Bay of Plenty's economic planning and in turn can help deliver on the outcomes defined in the Migration Settlement and Integration Strategy.

Bay of Plenty's migrant demographics

The 2013 Census estimated the Bay of Plenty's usual resident population at 267,741 – six percent of the total New Zealand population. This is a four percent increase in population since the 2006 Census. The Bay of Plenty is the fifth most populous region of the 16 regions in New Zealand.

The 2013 Census estimated that 17 percent of the Bay of Plenty's total population was born overseas. This is similar to the 18 percent of overseas-born in the total population recorded across the Rest of New Zealand (excluding Auckland)¹. However, it is quite a bit lower than Auckland where 39 percent of the population were born overseas.

This section of the report will look at the demographics of the Bay of Plenty's migrant population by gender, country of birth, and years since arrival in New Zealand. Comparisons between the migrant population and non-migrant population within the Bay of Plenty will be made, as well as a comparison with the migrant population of the rest of New Zealand.

Population size and gender

The 2013 Census estimated that 17 percent of the Bay of Plenty's population was born overseas. This is an increase on the two previous censuses, with 15 percent in the 2006 and 13 percent in 2001 Census. This is comparable to the Rest of New Zealand (excluding Auckland) where the migrant population as a proportion of the total population has grown from 14 percent in 2001 to 18 percent in 2013. This is illustrated in Figures 1-3.

Figure 1: The proportion of the overseas-born population compared to the New Zealand-born population in the Bay of Plenty in 2001, 2006 and 2013

Figure 2: The proportion of the overseas-born population compared to the New Zealand-born population in the Rest of New Zealand (excl. Auckland) in 2001, 2006 and 2013

¹ The Bay of Plenty has been compared to the Rest of New Zealand (excluding Auckland), and to Auckland. Auckland has a proportionally much larger migrant population than the rest of New Zealand.

Figure 3: The proportion of the overseas-born population compared to the New Zealand-born population in Auckland in 2001, 2006 and 2013

The male to female ratio of the overseas-born population is very similar nationwide. Of those living in the Bay of Plenty who were born overseas, 49 percent are male and 51 percent are female.

Region of origin of the migrant population

The region of origin composition of the overseas-born population within the Bay of Plenty resembles that of the Rest of New Zealand (excluding Auckland) as seen in Table 1. Forty percent of the overseas-born population of the Bay of Plenty is from the UK and Ireland. Like all other regions in New Zealand, except Auckland, this is the largest group within the region. A further 22 percent of the overseas population is from Asia.

Table 1: Percentage of overseas-born population by region of origin in 2013

Region of origin	Bay of Plenty	Rest of New Zealand (excluding Auckland)	Auckland
UK & Ireland	40%	36%	17%
Asia	22%	23%	39%
Australia	10%	9%	4%

Pacific Islands	6%	9%	21%
North America	4%	4%	2%
Other	2%	1%	1%

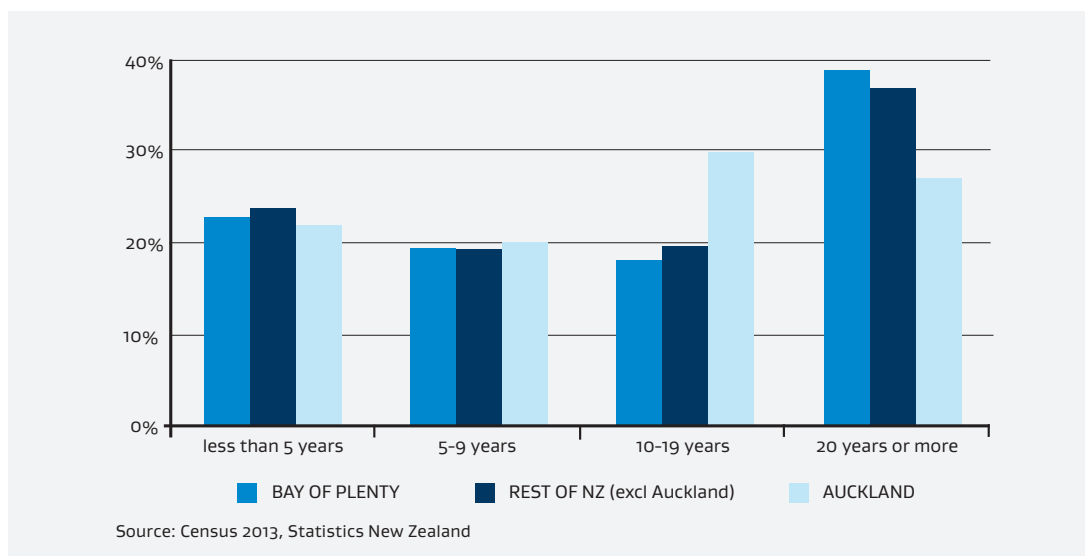

Source: Census 2013, Statistics New Zealand

* Europe (excl UK & Ireland)

Years since arrival

Of the overseas-born population living in the Bay of Plenty, about a quarter (23 percent) have been in New Zealand for five years or less. A larger proportion, 39 percent, have been living in the Bay of Plenty for 20 years or more; this proportion is slightly higher than for the rest of New Zealand and much higher than in Auckland.

Figure 4: Proportion of migrants in the Bay of Plenty, the Rest of New Zealand (excluding Auckland) and Auckland, by total length of time in New Zealand

Most recent migrants

Table 2 examines those migrants, living in the Bay of Plenty, who have been in New Zealand for two years or less. Of this group, 45 percent came from Asia; this is higher than the proportion (39 percent) of recent Asian migrants in the Rest of New Zealand (excluding Auckland), but lower than in the Auckland region (53 percent).

Most of the other regions of origin follow a similar pattern to the Rest of New Zealand (excluding Auckland). The exception is the Pacific Islands which account for only four percent of recent migrants in the Bay of Plenty, compared to seven percent for the Rest of New Zealand (excluding Auckland) and 12 percent in Auckland.

Table 2: Number and percentage of migrants by their region of origin, who have been in NZ less than two years

Migrants qualifications

A knowledge-based society relies on a highly qualified labour force, not only in high-tech and research sectors, but increasingly in all sectors of the economy and society. The Bay of Plenty's economy will continue to rely on offshore skills and talent to support its growth.

Table 3 shows that the overseas-born population of the Bay of Plenty is more qualified than the New Zealand-born population. This trend is the same across New Zealand.

Table 3: Overseas and New Zealand-born population by highest qualification attained

	No qualification	Level 1-3 certificate	Level 4 certificate or Level 5 or 6 diploma	Bachelor degree and level 7 qualification	Honours or post-graduate degree	Overseas secondary school qualification

Migration, and the Bay of Plenty labour market

Statistics New Zealand projects that net migration will result in an increase of 16,400 people in the Bay of Plenty between 2006 and 2031.

Immigration New Zealand (as part of MBIE), recognises the significance that migration plays in meeting workforce needs, and together with local council and economic development agencies has a shared interest in attracting and retaining migrants to the Bay of Plenty to meet skill shortages.

Immigration New Zealand's priorities align with the Government's Business Growth Agenda which prioritises lifting the skills and productivity of the workforce overall and ensuring skilled migration meets New Zealand's needs.

Bay of Plenty context

This section will focus on migrant participation in the Bay of Plenty's labour force.

Table 4 shows that both within the Bay of Plenty and across the country the labour force participation rate, employment rate and unemployment rate are similar. Figures 5-7 illustrate how these rates have changed over time in the Bay of Plenty, with the employment and not in the labour force rates for the overseas-born population aligning with those of the New Zealand-born population.

Table 4: Work and labour force status by birthplace and resident location²

		Employed full-time	Employed part-time	Unemployed	NILF*
Bay of Plenty	Overseas-born	46%	14%	4%	36%
	NZ born	48%	15%	5%	32%
Rest of NZ (excl Auckland)	Overseas-born	47%	14%	4%	35%
	NZ born	48%	15%	5%	32%
Auckland	Overseas-born	47%	12%	5%	36%
	NZ born	50%	14%	5%	31%

*Not in labour force

Source: Census 2013, Statistics New Zealand

As stated in a technical report published by Auckland Council³, participation, employment and unemployment rates are three of the most commonly reported and widely understood indicators of the state of the labour market. Respectively, they tell us the percentage of the population that is in the labour force, what percentage of the population is in work, and what percentage of individuals who want to work are unable to find a job. Together, these three indicators can provide insight into the pressures that individuals are facing in relation to finding and keeping a job, and the decisions they make about whether to seek work or to pursue other, non-work activities.

² Work and labour force status classifies a person aged 15 years and over by their inclusion or exclusion from the labour force. For an employed person, it distinguishes between full-time employment (30 hours or more per week) or part-time employment (fewer than 30 hours per week). A person who was not employed is classified as either 'Unemployed' or 'Not in the labour force'

Permanent migration

People who wish to migrate permanently to New Zealand must apply through categories that come under one of the three residence streams of the New Zealand Residence Programme (NZRP). These are:

- › Skilled/Business Migrant Category – 52 percent of NZRP in 2013/14
- › Family Category – 40 percent of NZRP in 2013/14
- › International (Pacific Access Category and the Samoan Quota) and Humanitarian (refugees) – 8 percent of NZRP in 2013/14

Residence provides a person with the right to live in New Zealand and to gain access to all the normal work, business, education, property, and health privileges available to New Zealanders. The permanent migrant flows have been relatively stable over time. In 2013/14, there were 44,008 residence approvals in New Zealand, up from 38,961 in 2012/13. In 2013/14, 73 percent of residence applications were approved in New Zealand (onshore). This is as a result of immigration policies that support the transition of migrants who have been living and working in New Zealand from temporary to permanent visa status⁴.

Bay of Plenty context

The data on permanent migrants in the Bay of Plenty refers to migrants coming to New Zealand under the Skilled Migrant Category (SMC). New Zealand needs skilled migrants to contribute to productivity, skills acquisition, diversity and growth in a variety of industries. The SMC is a points-based system designed to ensure people migrating to New Zealand have the skills, qualifications and work experience that New Zealand needs.

The SMC is also the largest migrant stream in the NZRP, accounting for 46 percent of NZRP applications. In 2013/14, 51 percent of migrants approved under the SMC were principal applicants and 49 percent were secondary applicants (partners and children).

In 2013/14 the Bay of Plenty attracted four percent of skilled migrant category principal applicants to New Zealand. Skilled principal applicants receive bonus points in their application for having an offer of employment outside of Auckland to enhance the ability of other regions to utilise immigration to support regional economic development.

Source country

The following table (Table 5) shows the source country of SMC principal applicants from 2009/10 to 2013/14. Overall there is a national and regional trend of declining numbers of migrants from the UK, and a rise in migrants from India and China. The figures for Bay of Plenty show similar trends. Figure 8 shows the trend across the top five source countries for the years 2009/10 to 2013/14.

⁴ These policies include the Long Term Business Visa, Work to Residence, and Study to Work Policies for foreign graduates.

Table 5: Top source country of Skilled Migrant Category principal applicants in the Bay of Plenty

Source country of principal applicant	2009/10	2010/11	2011/12	2012/13	2013/14
India	43 (10%)	85 (19%)	85 (28%)	76 (27%)	154 (39%)

Occupations

Table 6 shows the ranking for the top 10 occupational groups under which skilled migrants received an offer of employment for the 2013/14 year. It shows occupations by industry and occupation⁶.

The table shows the number of approved workers for the Bay of Plenty in the 2013/14 year. The second column of data shows the percentage change for each occupation from the 2012/13 year, while the last column shows the top two source countries for each.

⁵ This may differ to the total in the table due to rounding

⁶ Occupations are based on those defined by The Australian and New Zealand Standard Classification of Occupations (ANZSCO). Occupations listed under industry in this report, are equivalent to those listed under the ANZSCO sub-major group.

Table 6: Skilled Migrant Category approved applicants, with a job offer in the Bay of Plenty

Temporary migration

The temporary work policy aims to facilitate the access of employers and industry to global skills and knowledge, while complementing the Government's education, training, employment and economic development policies.

Work visas allow employers to recruit temporary workers from overseas to meet particular or seasonal work shortages as well as protecting employment opportunities and conditions for New Zealand workers. In 2013/14, 155,794 people were granted work visas in New Zealand, an increase of seven percent from the 144,936 approvals in the previous year. Immigration New Zealand statistics show that many temporary workers later secure permanent residence in New Zealand. Research shows that around one-third of temporary workers gain residence within five years⁷.

The Essential Skills policy facilitates the entry of people required on a temporary basis to fill shortages where suitable New Zealand citizens or residents are not available for the work offered. The demand for Essential Skills workers slowed down from October 2008 with the onset of the global economic slowdown and its effect on the domestic economy.

Bay of Plenty context

In the last two years the demand for Essential Skills workers has increased. In 2013/14, a total of 26,502 people were approved to work in New Zealand under the Essential Skill work policy. The Bay of Plenty accounts for about four percent of these workers. This is illustrated in Table 7.

Working Holiday makers, partners of work visa holders, partners of some student visa holders and partners of New Zealand citizens and residents can also be issued temporary work visas. However the administrative data does not identify how many of these individuals moved to the Bay of Plenty.

Essential skills workers

The Essential Skills Category is a good indicator of labour demand as it is a labour market tested visa. This means that the occupation recorded on the Essential Skills visa is either on one of the Essential Skills in Demand lists or, a labour market test has been done to ensure there are no New Zealanders who can do, or be readily trained to do, the job offered and, that the employer has genuinely searched for suitably qualified and trained New Zealand workers.

⁷ MBIE, Migration Trends and Outlook 2012/2013

Source country

In 2013/14, 847 Essential Skills workers were approved with an offer of employment in the Bay of Plenty. Table 8 shows the top five source countries of these workers. In 2013/14, these top five source countries accounted for 64 percent of the total number of Essential Skills workers with a job offer in the Bay of Plenty.

Table 8: Source country of Essential Skills workers 2009/10 to 2013/14

	2009/10	2010/11	2011/12	2012/13	2013/14
India	70 (9%)	90 (12%)	134 (18%)	170 (24%)	215 (25%)
UK	151 (19%)	156 (20%)	155 (21%)	123 (18%)	145 (17%)

Occupations

Table 9 shows the ranking for the top 10 occupational groups for which Essential Skills workers received an offer of employment for the 2013/14 year. It shows occupations by industry and occupation⁸. The table shows the number of approved Essential Skills workers for the Bay of Plenty in the 2013/14 year. The second column of data shows the percentage change for each occupation from the 2012/13 year, whilst the last column shows the top two source countries for each.

⁸ These occupations are based on those defined in The Australian and New Zealand Standard Classification of Occupations (ANZSCO). Occupations listed under industry in this report, are equivalent to those listed under the ANZSCO sub-major group.

International students

International Education makes a considerable contribution to New Zealand's economy. The current economic value of export education is estimated to be worth \$2.6 billion. The Leadership Statement for International Education 2011 which aims to double the economic value of international education to \$5 billion over the next 15 years, includes targets to:

- › increase the number of international students enrolled in New Zealand providers offshore, from 3,000 to 10,000
- › double the number of international postgraduate students (particularly in programmes in addition to those at PhD level) from 10,000 to 20,000
- › increase the transition rate from study to residence for international university students.

International students also contribute to New Zealand's skilled workforce. Many of them (37 percent) stay to work in New Zealand after they complete their study and 42 percent of skilled migrant category principal applicants used to be an international student in New Zealand⁹. To ensure New Zealand continues to benefit from having international students and secure a healthy growth in this sector, we must ensure that international students in New Zealand have a high quality experience. This enables us to maintain New Zealand's reputation as a safe and attractive education destination.

The Student Policy aims to facilitate the entry of genuine students with a focus on attracting and developing students who have the skills New Zealand needs. Steps to promote pathways to work and residence for skilled international students are facilitated through immigration policies. These policies are intended to attract genuine international students and enable the most skilled to stay in New Zealand and take up skilled employment, so that they can help drive economic growth.

Over the past decade, 22 percent of student visa holders were granted a resident visa within five years of being issued their first student visa¹⁰. The trend is a steady take up of permanent residence over time. Several factors might influence the length of time it takes a student to get residence, including the length of time of study and whether there is an intermediary move to a work visa before applying for residence.

In 2013/14, 73,510 international students were approved to study in New Zealand, a 15 percent increase from 64,190 in 2012/13.

Bay of Plenty context

In 2013/14, 2,313 people intending to study in the Bay of Plenty were granted student visas. This represents a 29 percent increase from 2012/13 (see Table 10). In the same period the growth in new student visa applicants studying in the Bay of Plenty was 24 percent (see Table 11).

The following dashboard is based on Immigration New Zealand (INZ) data on student visas issued. This data source is the most immediate data available on the international education sector, as there is only a one month lag between student visas approved and INZ publishing the data. Student visa data is a strong indicator of whether students are remaining, leaving or entering New Zealand to study, which can be used as a predictor for future enrolment trends.

The report linked below is from Education New Zealand's website. It provides a snapshot of the trends in New Zealand's international education industry for the 2014 year to date. The report uses data from the Export Education Levy, Single Data Return (SDR) and student visa statistics from INZ. This report builds on similar reports released for January- April 2013, January- August 2013, and a full year report for the 2013 year.

Conclusion and further information

This report collated data from Statistics New Zealand's 2013 Census and INZ data sourced from MBIE. The report provides an overview of the demographics of the overseas-born population living in the Bay of Plenty, and detailed information on the source country and occupation of migrants who have come to New Zealand under the SMC and the Essential Skills policy with job offers in the Bay of Plenty. Some of the key points of note are:

- › 17 percent of the Bay of Plenty's population are overseas-born
- › 40 percent of the Bay of Plenty's overseas-born population come from the United Kingdom and Ireland, and a further 22 percent from Asia
- › 39 percent of the approved SMC principal applicants with a job offer in the Bay of Plenty in 2013/14 came from India
- › The top three occupations for SMC principal applicants, in the Bay of Plenty, were: registered nurses; chefs and; café and restaurant managers
- › 25 percent of approved Essential Skills workers in the Bay of Plenty came from India, followed by the United Kingdom with 17 percent
- › The top three occupations for Essential Skills workers in the Bay of Plenty were: chefs; general practitioners and resident medical officers; and aged and disabled carers
- › Four percent of student visas granted in 2013/14, where a region was specified, were for study in the Bay of Plenty.
