Submitter information

The Ministry of Business, Innovation and Employment (MBIE) would appreciate if you would provide some information about yourself. If you choose to provide information in the "About you" section below it will be used to help MBIE understand the impact of our proposals on different occupational groups. Any information you provide will be stored securely.

A.	About you				
	Name:	Michelle Phillips			
	Email address:	Privacy of natural persons			
В.	Are you happy fo ⊠ Yes	r MBIE to contact you if wo	ve have questions about your su □ No	bmission?	
C.	Are you making this submission on behalf of a business or organisation? ☐ Yes ☐ No				
	If yes, please tell us the title of your company/organisation:				
	Ngati Tahu-Ngat	ti Whaoa Runanga Trust			
D.	☐ Academic/researce☐ Community group☐ Consultant (please☐ Tradesperson (ple☐ Industry group (please	ase specify below)	☐ Independent expert (please specify b☐ Business owner (please specify b☐ Environmental NGO (please specify below)☐ Student (please specify below)☐ Other (please specify below)☐ Prefer not to say	elow)	
	lwi Authority				

E.	Privacy information			
	The Privacy Act 2020 applies to submissions. Please check the box if you do not wish your name or other personal information to be included in any information about submissions that MBIE may publish.			
	MBIE may upload submissions, or a summary of submissions, received to MBIE's website at www.mbie.govt.nz . If you do not want your submission or a summary of your submission to be placed on our website, please check the box and type an explanation below: I do not want my submission placed on MBIE's website because [insert reasoning here]			
	Tao not want my submission placed on MBIE's website because [insert reasoning nere]			
F.	Confidential information			
	I would like my submission (or identifiable parts of my submission) to be kept confidential and have stated my reasons and ground under section 9 of the Official Information Act that I believe apply, for consideration by MBIE.			
	If you have checked this box, please tell us what parts of your submission are to be kept confidential.			

A Draft Critical Minerals List for New Zealand

MBIE is developing a critical minerals list for New Zealand to identify the minerals that are:

- essential to New Zealand's economy, national security, and technology needs, including renewable energy technologies and components to support our transition to a low emissions future; and/or
- in demand by New Zealand's international partners to enable us to benefit from international economic opportunities, contribute to the diversification of global mineral supply chains and improve the pipeline of the end-use products for which these minerals are essential; and
- susceptible to supply disruptions domestically and internationally. In some instances, we rely on
 domestic sources of minerals, but the supply of these minerals can be constrained, for example by
 regulatory factors and social licence. Internationally, supply chain disruptions could arise due to
 geopolitical risks and external market forces.

Minerals play an essential role in New Zealand's economic growth through high-paying jobs, Crown royalties, direct positive impact in the regions where mining takes place, and through export revenues. Minerals are also critical inputs into products that are necessary for other sectors to thrive, including the use of aggregates in construction and infrastructure.

Minerals are also essential to modern economies as they are needed to manufacture advanced technologies such as semi-conductors, defence applications and medical equipment. Minerals are also critical for a clean energy transition as low emission technologies requires more mineral inputs than those fuelled by fossil fuels.

The extraction and processing of the minerals essential to New Zealand and our international partners are concentrated in a few countries. Any disruption that interrupts operations at a large facility or group of facilities can have a major impact on supply availability, and therefore on prices. The greater the concentration of production the larger the affect a disruption can have.

In addition, New Zealand does not manufacture a wide range of technologies, we are generally an end consumer of many products produced internationally and rely on the functioning of international supply chains and their access to resilient supplies of minerals.

The development of a critical minerals list is one of the key actions identified in the draft Minerals Strategy that was publicly consulted on from 23 May – 31 July 2024. Due to the technical nature of the list, MBIE engaged a consultancy with specialist expertise, Wood Mackenzie, to support the development of the list.

We are seeking feedback on the content of the draft list that has been developed by Wood Mackenzie for New Zealand. It identifies the minerals that are critical to New Zealand and summarises the reason for their inclusion in the list. Once the list is finalised, actions could be identified to help us reduce the 'criticality' of those minerals, i.e., secure better access to them.

Please see the draft Critical Minerals List attached below for more information.

Questions for the consultation

1.	Have we missed the inclusion of any mineral(s) on the draft Critical Minerals List?			
	\boxtimes Yes, (please provide more details below) \square No, the list is okay. \square Not sure/no preference Is there anything you would like to tell us about the reason(s) for your choice?			
	Lithium- Potential new NZ industry or future export opportunity. New technology is being developed to extract lithium from used geothermal fluid (after power stations have taken off the heat) which could be marketed as a "green" method of mining			
2.	Have we included any mineral(s) that you think should not be on the list?			
	\square Yes, (please provide more details below) \boxtimes No, the list is okay. \square Not sure/no preference Is there anything you would like to tell us about the reason(s) for your choice?			
3.	Do you have any further feedback on the list, or the methodology under which it was developed?			
	\boxtimes Yes, (please provide more details below) \square No, the list is okay. \square Not sure/no preference Is there anything you would like to tell us about the reason(s) for your choice?			
	No feedback on the list itself or how it was developed but want to see how this fits within the Crown Minerals Act, especially concerning ownership rights. I expect that the inclusion of the list and the detail regarding how the government potentially plans to manage national expectations for the betterment of "national significance" will be the next tranche of work and we expect as iwi partners to be consulted on this kaupapa. A spatial analysis map is also required when developing the next tranche of work so we all know where most of the critical minerals sit around the motu.			

Thank you

Thanks for your feedback, we really appreciate your insight on the development of New Zealand's Critical Minerals List.
