

For Submission of opinion to CCCFA law reform

: from Glenn's personal point of view not from Organisation overall

I Believe all Trucks and Mobile services need to provide the goods straight away at only 10% above market prices to vulnerable clients.

I think the clients should be credit checked as well unless its urgent provisions food and clothing, shoes and blankets.

Interest rates should be capped at 15% - 20% on any contract across the whole business market its impossible for general public to pay back money owed when not on a salary that keeps up with inflation.
