## APPENDIX 1 – INTELLECTUAL PROPERTY POLICIES AND PRINCIPLES

In the following principles, “should” indicates a non-obligatory best practice.

1. The Contractor must use its best endeavours to maximise the benefits to New Zealand of each Science Programme through its management of any Science Programme Intellectual Property Rights.
2. The Contractor must, before this Contract commences, have a set of Intellectual Property Policies and Principles in place in respect of this Contract.
3. The Contractor’s Intellectual Property Policies and Principles must:
  - (i) determine the ownership and/or assignment, if any, of Science Programme Intellectual Property Rights and require employees, or grant holders using the Contractor for that purpose, to acknowledge the relevant ownership and rights associated with Science Programme Intellectual Property;
  - (ii) ensure that researchers are advised of the potential value of Science Programme Intellectual Property Rights and of the options available to them to add value to those rights;
  - (iii) ensure that researchers are advised of any actual or potential confidentiality issues relating to Science Programme Intellectual Property Rights;
  - (iv) make clear and binding to the Contractor's staff the separate and mutual obligations of the staff and the Contractor in relation to Science Programme Intellectual Property Rights management and protection;
  - (v) set out a review process to identify protectable and potentially valuable Science Programme Intellectual Property Rights and associated commercial activities and to prevent the infringement of existing protected Science Programme Intellectual Property Rights and associated commercial activities;
  - (vi) provide guidance on the prompt disclosure and resolution of potential conflicts of interest concerning the generation, ownership, management and use of Science Programme Intellectual Property Rights, such as on:
    - (a) staff members' financial interests in external firms that contract with the Contractor, particularly where these entail research contracts and the exchange of Intellectual Property Rights;
    - (b) the nature and terms of institutional support for start-up companies and the equity holdings of the Contractor and its staff.
  - (vii) satisfy all legal and regulatory obligations with such amendments promptly incorporated as may be necessary to comply with all changes or additions to

legal or regulatory obligations that may be made during the term of this Contract Science Programme ; and

- (viii) cover good scientific conduct, including sound record keeping and human and animal experimentation ethics.
4. The Intellectual Property Policies and Principles should ensure that cultural, Treaty of Waitangi and Māori issues are properly taken into consideration.
  5. The Contractor should give preferential access to competent New Zealand-based firms to develop the Science Programme Intellectual Property Rights. Where a Contractor believes that it is best to commercialise the Science Programme Intellectual Property Rights outside of New Zealand, the Contractor should seek to retain ongoing research, science, and technology in New Zealand and reinvest any net income derived from the commercialisation of the Science Programme Intellectual Property Rights in research, science, and technology in New Zealand.
  6. The Contractor should, wherever possible:
    - (i) provide assistance to researchers in fulfilling Science Programme Intellectual Property Rights obligations and responsibilities;
    - (ii) encourage participation by researchers in any subsequent commercialisation process of any Science Programme Intellectual Property Rights; and
    - (iii) develop policies that incentivise staff and other stakeholders to generate benefits to New Zealand from the work.
