Page 4: Objectives

Q7 Q1 Are the above objectives the right ones for New Zealand's copyright regime? How well do you think the copyright system is achieving these objectives?

Respondent skipped this question

Q8 Q2 Are there other objectives that we should be aiming to achieve? For example, do you think adaptability or resilience to future technological change should be included as an objective and, if so, do you think that would be achievable without reducing certainty and clarity?

Respondent skipped this question

Q9 Q3 Should sub-objectives or different objectives for any parts of the Act be considered (eg for moral rights or performers' rights)? Please be specific in your answer.

Respondent skipped this question

Q10 Q4 What weighting (if any) should be given to each objective?

Respondent skipped this question

Page 5: Rights: What does copyright protect and who gets the rights?

Q11 Q5What are the problems (or advantages) with the way the Copyright Act categorises works?

Respondent skipped this question

Q12 Q6Is it clear what 'skill, judgement and labour' means as a test as to whether a work is protected by copyright? Does this test make copyright protection apply too widely? If it does, what are the implications, and what changes should be considered?

Respondent skipped this question

Q13 Q7Are there any problems with (or benefits arising from) the treatment of data and compilations in the Copyright Act? What changes (if any) should be considered?

Respondent skipped this question

Q14 Q8What are the problems (or benefits) with the way the default rules for copyright ownership work? What changes (if any) should we consider?

We should introduce changes in line with the UK, Canada, Australia and the US so that a person who commissions a work is no longer the first owner of copyright. An idea is not copyrightable, only a final product. If someone has commissioned the work they have not created the work, but rather, just the idea. The first owner of the copyright should be the person who executed the idea.

Q15 Q9What problems (or benefits) are there with the current rules related to computer-generated works, particularly in light of the development and application of new technologies like artificial intelligence to general works? What changes, if any, should be considered?

Respondent skipped this question

Q16 Q10What are the problems (or benefits) with the rights the Copyright Act gives visual artists (including painting, drawings, prints, sculptures etc.)? What changes (if any) should be considered?

Respondent skipped this question

Q17 Q11What are the problems creators and authors, who have previously transferred their copyright in a work to another person, experience in seeking to have the copyright in that work reassigned back to them? What changes (if any) should be considered?

There should be a period of time after which a copyright should default back to a creator/author. Rather than transferring copyright to a publishing company on a permanent basis, the copyright of a creative work should more accurately function like a loan, with a fixed end point.

Q18 Q12What are the problems (or benefits) with how Crown copyright operates? What alternatives (if any) do you think should be considered?

Crown copyright is way too long. Return it to 50 years.

Q19 Q13 Are there any problems (or benefits) in providing a copyright term for communication works that is longer than the minimum required by New Zealand's international obligations?

Respondent skipped this question

Q20 Q14 Are there any problems (or benefits) in providing an indefinite copyright term for the type of works referred to in section 117?

Respondent skipped this question

Q21 Any other comments on Rights: what does copyright protect and who gets the rights?

Q23 Q16 Are there any problems (or benefits) with the secondary liability provisions? What changes (if any) should be considered?

Respondent skipped this question

Q24 Q17 What are the problems (or advantages) with the way authorisation liability currently operates? What changes (if any) do you think should be considered?

Authorisation liability should be lightened. While it should be illegal for NZ websites to host infringing material, in the modern internet trying to stop websites from linking to infringing material is like trying to play whack-a-mole in the dark. It's not a sensible use of resources.

Q25 Any other comments on Rights: what actions does copyright reserve for copyright owners?

Q26 Q18 What are the problems (or advantages) with the way the right of communication to the public operates? What changes, if any, might be needed?

Respondent skipped this question

Q27 Q19 What problems (or benefits) are there with communication works as a category of copyright work? What alternatives (if any) should be considered?

An individual or household should not constitute the 'public' with regards to communication works. A definition of the 'public' with regards to these works should be defined.

Q28 Q20What are the problems (or benefits) with using 'object' in the Copyright Act? What changes (if any) should be considered?

Respondent skipped this question

Q29 Q21Do you have any concerns about the implications of the Supreme Court's decision in Dixon v R? Please explain.

Respondent skipped this question

Q30 Q22What are the problems (or benefits) with how the Copyright Act applies to user-generated content? What changes (if any) should be considered?

User-generated content and other transformative works should be encouraged under the Copyright Act.

Q31 Q23What are the advantages and disadvantages of not being able to renounce copyright? What changes (if any) should be considered?

Respondent skipped this question

Q32 Q24Do you have any other concerns with the scope of the exclusive rights and how they can be infringed? Please describe.

Overall, I think the scope of exclusive rights needs to take into account the motivation to the copying of the work. A copy made for individual personal use should be treated akin to how copies are allowed to be made by an individual student for the purposes of their study.

Is it because of a lack of certainty? How do you assess any risk relating to the use? Have you ever been threatened with, or involved in, legal action? Are there any other barriers?

Respondent skipped this question

Q41 Q31What are the problems (or benefits) with how any of the criticism, review, news reporting and research or study exceptions operate in practice? Respondent skipped this question

Q50 Q40 What problems (or benefit) are there with the use of quotations or extracts taken from copyright works? What changes, if any, should be considered?

The use of quotations should be permitted under NZ copyright law, though a line should be drawn between quotations with sufficient acknowledgement and plagiarism.

Q51 Any other comments on Exceptions and Limitations: exceptions that facilitate particular desirable uses

Respondent skipped this question

Page 10: Exceptions and limitations: Exceptions for libraries and archives

Q52 Q41 Do you have any specific examples of where the uncertainty about the exceptions for libraries and archives has resulted in undesirable outcomes? Please be specific about the situation, why this caused a problem and who it caused a problem for.

Q53 Q42 Does the Copyright Act provide enough flexibility for libraries and archives to copy, archive and make available to the public digital content published over the internet?
