Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Strongly disagree

Why?

There is no future for people or planet in a carbon based industry. They simply cannot and will not operate in either a socially or environmentally friendly way. Profit will always come first.

What is your vision for the minerals and petroleum sector in New Zealand?

No further exploration, absolutely no fracking.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

By developing new non-carbon energy sources eg further geothermal development

Absolutely no fracking. EVER.
