Business name or organisation (if applicable):

Position title (if applicable):

Is this an individual submission or on behalf of a group or organisation?

Individual

Please indicate which group you most identify with or are involved in?

General public

Please specify the group that you most identify with

Please indicate which type of group your submission represents.

Please specify the group or organisation that your submission is on behalf of.

Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Agree

Why?

What is your vision for the minerals and petroleum sector in New Zealand?

phasing out fossil fuel extractions and engaging with a circular economy.

How can New Zealand sustainably derive value from its petroleum and minerals resources?

NZ can derive sustainability from it's petroleum and mineral resources by leaving them in the environment and not extracting them. Use and recycle the resources that are already extracted.

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Agree

Why?

Transitioning to a carbon neutral economy is vital for our future. NZ needs to lead by example.

Objective for a sector that: “Is productive and innovative”.

Neither agree nor disagree

Why?

If extraction has to go ahead I agree that it needs to be productive and innovative. NZ's petroleum and mineral deposits are poor quality and low density, making their extraction to be as productive as possible.

Objective for a sector that: "Is effectively regulated".

Strongly agree

Why?

This is a must. Regulation is extremely important when modifying the environment to the extreme levels extraction relies on.

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

The restoration process must be effective. Not like the Tui mine at Te Aroha which has been a disaster.

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Disagree

Why?

The majority of New Zealanders do not want to protect our endemic biodiversity or the environment at many levels. Proposals such as having landfill in the Dome valley to the anti 1080 movement are demonstrations of how our endemic ecosystems are not respected.

Principle: Māori cultural interests are understood and respected.

Neither agree nor disagree

Why?

Principle: Support the transition to a carbon neutral economy by 2050.

Agree

Why?

a carbon neutral economy needs to be more rapid than 2050

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Agree

Why?

As far as I can tell people are given fair compensations when extraction is local to them- for example the martha mine in waihi brings many benefits to their community.

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Strongly agree

Why?

TimesSelect to being carbon neutral and alleviates pressure as we take less from the environment

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Agree

Why?

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Neither agree nor disagree

Why?

I don't know these figures. I don't know how I feel about this either I feel it's corrupt if they get too much but then I understand why they should receive financial returns to put into something good. the nee

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Disagree

Why?

Its hard to follow how decisions are made. Not very transparent.

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Agree

Why?

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Agree

Why?

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Disagree

Why?

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Neither agree nor disagree

Why?

Principle: Strive to implement industry best practice in operations.

Agree

Why?

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Agree

Why?

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Neither agree nor disagree

Why?

Are there any other principles you would like us to consider in the strategy?

Action areas intro

Action Area: Modernising the Crown Minerals Act

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Needs to focus on rapid carbon neutrality and creating a circular economy

Action Area: Securing affordable resources to meet our minerals and energy needs

Agree

Why?

As long as what we are extracting is for us- not exports!

What future actions would you like us to consider under this Action Area?

Action Area: Improving Treaty partnership

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving stakeholder and community engagement

Agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving industry compliance

Agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Research and investment in better mining and resource use

Agree

Why?

What future actions would you like us to consider under this Action Area?

Are there any other action areas you would like us to consider as part of advancing this Strategy?

Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

If you wish to, attach a document to this submission.

Use and release of information

We intend to upload submissions to our website at www.mbie.govt.nz. Can we include your submission on the website?

Yes

Can we include your name?

No

Can we include your email address?

No

Can we include your business name or organisation?

No

Can we include your position title?

No

Can we include the group you most identify with (if submitting as an individual)?

Yes

Can we include the group your submission represents (if submitting on behalf of a group or organisation)?

If there are any other parts to your submission that you do not want public on the website please note them below:
